

A SINGLE BUTTON ALERTS ALL NECESSARY ADMINISTRATION

14IP's Panic Button™ allows a user to notify all needed parties, indicating a problem and identifying the location, without detection.

Panic

Button

The 14IP Panic Button is available for 14IP Phones and is compatible with Clearly Cloud, ComXchange, TangoPBX, and FreePBX® based systems.

Instant Emergency Communication

The 14IP Panic Button is a powerful safety feature designed to provide immediate help at the press of a button. Integrated directly into 14IP Phones, and available as an optional USB Panic Button that connects to 14IP VoIP phones, it allows staff to discreetly trigger pre-programmed emergency alerts such as lockdowns, overhead paging, SMS, or email notifications. Fully compatible with Clearly Cloud, ComXchange, FreePBX® based systems, and TangoPBX®, the 14IP Panic Button ensures critical messages reach the right people instantly, keeping organizations prepared, compliant, and secure when it matters most.

Why Do Organizations Need the ClearlyIP Panic Button?

The 14IP Panic Button is about speed, safety, and certainty, ensuring that when emergencies happen, the right people know instantly and can act immediately.

Rapid Emergency Response

A single button press instantly initiates calls, pages, or alerts to security teams, 911 services, or designated responders.

Compliance & Liability Protection

Supports compliance standards such as Alyssa's Law for schools, while helping businesses reduce liability by proactively improving workplace safety.

Peace of Mind

Provides assurance to staff, students, patients, and visitors that help is only one button away.

Discreet Activation

Staff can quietly request help without escalating or drawing attention during dangerous situations.

Customization & Integration

Works seamlessly with Clearly Cloud, ComXchange, and FreePBX® based systems, allowing alerts for emergency protocols like lockdowns, paging, SMS, or email.

Centralized Safety Communication

Unifies emergency notifications into a single, reliable channel so that everyone receives the same critical message at the same time.

Organizations That Benefit from CodeX

The 14IP Panic Button enhances safety and awareness across a wide range of environments. From education and hospitality to healthcare, corporate offices, and government facilities, it adapts to diverse operational needs while integrating seamlessly with 14IP desk phones and optional USB add-ons.

Education K-12 and Higher Education

The 14IP Panic Button allows staff to discreetly trigger emergency alerts that instantly notify administrators, security teams, or first responders. In K-12 schools, it can support lockdowns, overhead paging, or direct alerts when a classroom is in danger. On college campuses, it helps Public Safety quickly identify the source of an emergency ensuring critical information reaches responders without delay.

Government & Municipal

Courthouses often have dozens of courtrooms, and municipalities may house many departments across large buildings. The 14IP Panic Button allows staff in any location to instantly trigger alerts that notify security teams, administrators, or first responders. Alerts can be customized by room, floor, or department, ensuring the right groups are reached immediately and enabling a faster, more coordinated emergency response.

Healthcare

Healthcare facilities rely on clear and rapid communication during emergencies. The Panic Button allows nurse stations, reception, and patient care areas to discreetly trigger targeted alerts or facility-wide notifications. These alerts reach administrators and first responders instantly, helping ensure patients and staff remain safe and accounted for in critical situations.

Hospitality

Hospitality properties often have hundreds of rooms and large public areas where emergencies may arise. The 14IP Panic Button enables staff to quickly send alerts to specific areas or broadcast property-wide notifications, giving management and emergency services the timely information they need to coordinate an effective response and keep guests and staff safe.

Retail

Retail stores and shopping centers often span multiple service counters, back offices, and storage areas. The 14IP Panic Button allows managers and staff to instantly trigger alerts across all locations, ensuring security teams and responders are notified immediately and can act quickly to protect employees and customers.

Corporate & Industrial

Large office buildings and industrial facilities often have critical points like reception areas, HR offices, control rooms, and guard stations. The 14IP Panic Button allows administrators or staff to instantly alert specific groups or the entire site, ensuring management and emergency services are notified right away to take swift, coordinated action.

Types of Emergencies Where Panic Button Helps

The 14IP Panic Button provides fast and reliable communication during emergencies. Whether facing safety threats, medical incidents, or security risks, the Panic Button ensures staff can instantly trigger alerts, notify the right groups, and help first responders receive accurate information when it matters most.

Unauthorized Persons

If an intruder or unapproved individual is on-site, Panic Button allows administrators to be notified immediately and listen in on the emergency situation to coordinate a safe response.

Severe Weather

In tornadoes, hurricanes, or other extreme weather, Panic Button can be used to immediately notify an emergency team of damages or employees that need assistance.

Medical Emergencies

If a serious medical event occurs, Panic Button allows staff to notify responders quickly and confirm which areas need immediate assistance.

Earthquakes

When seismic activity strikes, Panic Button provides instant communication and alerts to take protective action.

Fires

During a fire, Panic Button can notify an emergency team to start evacuations quickly.

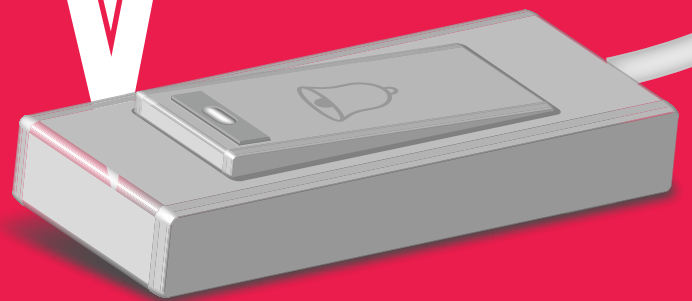

Hazardous Substances

Emergency teams can be alerted of Chemical spills, gas leaks, or other hazardous materials quickly.

Panic Button

For added protection, the 14IP Panic Button can be combined with CodeX and Silent Intercom™. Together, these solutions provide a powerful safety suite, delivering instant alerts, discreet communication, and real-time coordination to ensure the fastest possible response in any emergency.
